

Start critical work faster - with training evidence your auditors can trust.

SmartStart replaces slow, paper-led and classroom-heavy onboarding with a secure digital path engineers, contractors and specialist teams can complete before they travel, from home, on mobile or in a web browser.

For turnarounds, shutdowns and mobilisation programmes, the commercial risk is simple: if certified people are not available when the window opens, delays cost money.

PDPL-ready • In-Kingdom deployment available • Web, iOS and Android • Arabic RTL native

WHY THIS MATTERS

Delayed readiness is expensive.

- Turnaround windows are fixed, scarce and costly to move.
- Engineers may arrive before they are cleared to start.
- Classroom slots create bottlenecks during mobilisation peaks.
- Paper evidence is slow to audit and easy to challenge.

SmartStart moves onboarding and certification upstream - before arrival, before site access, before the critical path is exposed.

Before travel

THE OPERATIONAL PROBLEM

Onboarding delays turn into real turnaround cost

The issue is not simply training administration. It is the cost of waiting: delayed site access, late mobilisation, repeated classroom sessions, manual evidence checks, and readiness gaps discovered too close to the start date.

Paper/classroom bottlenecks

Physical induction queues, manual sign-offs and limited classroom capacity slow readiness exactly when volume peaks.

Late visibility

Managers cannot easily see who is ready, who is blocked, and what evidence exists until the mobilisation risk is already live.

Weak proof

Completion records alone do not prove identity, attention, integrity or assessment conditions when a result is challenged.

SMARTSTART ANSWER

Digital onboarding before the engineer enters the Kingdom

1. Create

Turn SOPs, PDFs or prompts into lessons, question banks, translations and avatar-led training in minutes.

2. Complete

Assign onboarding to engineers and contractors before arrival; complete on mobile or browser from home.

3. Prove

Issue certificates backed by proctored assessments, signed evidence, review trails and public verification.

COMMERCIAL OUTCOME

- Earlier clearance before site arrival
- Reduced classroom dependency and rework
- Lower risk of turnaround start delays
- Audit-ready evidence for every certificate

BEST FIT

- Turnarounds and shutdowns
- Contractor induction
- Safety-critical competency
- Regulated industrial training

Fast digital onboarding with defensible certification

SmartStart is not a generic LMS. It combines AI course creation, mobile-ready delivery, proctored assessment, public certificate verification and enterprise reporting in one workflow.

AUTHOR

AI authoring at mobilisation speed

- SOP, PDF, URL or prompt ingestion
- Lessons, quizzes and study modes generated in parallel
- Arabic, English, Hindi and Urdu support
- Human approval gates before publishing

INTEGRITY

Proctoring that creates evidence

- Identity matching against enrolment
- Gaze, attention, audio and environment checks
- 30-second signed screenshot evidence chain
- Reviewer workflow, appeals and forensic export

COMPLIANCE

Compliance-ready credentials

- Public certificate verification by QR or code
- Expiry and recertification campaigns
- HMAC-signed audit logs
- PDPL/GDPR tooling and encrypted PII

END-TO-END WORKFLOW

1

Ingest

SOPs, manuals and policy documents

2

Generate

Lessons, exams and translations

3

Assign

Send to people before arrival

4

Assess

Proctored on mobile or browser

5

Certify

QR-verifiable credentials

EVIDENCE BUNDLE

When challenged, show proof - not opinion.

- Signed manifest and event timeline
- Captured evidence chain with tamper detection
- Learner answers, risk score and reviewer actions
- Exportable record for HR, auditors or regulators

ENTERPRISE CONTROLS

Built for large operational programmes

- Role-based training paths and prerequisites
- Contractor and third-party portals
- Bulk assignment and CSV import
- Dashboards for overdue, completion and certificate status

CUSTOMER DEMO

Bring one SOP. See it become a proctored, certified course live.

In a 30-minute walkthrough, SmartStart can generate the onboarding course, run a proctored assessment, and issue a verifiable certificate while the customer watches.

POSITIONING LINE

SmartStart helps industrial operators clear engineers and contractors before arrival, reduce mobilisation bottlenecks, and protect turnaround start dates with auditable digital training evidence.

- Faster readiness
- Lower delay risk
- Mobile and browser completion
- Arabic-first enterprise deployment
